SKILLS

PHP

Angular

MySQL

CodeIgniter

JavaScript

jQuery

CSS

Cpanel

WHM

React Native

RestAPI

HMVC

WebRTC

Hybrid App

HTML

MVC

JIRA

SUMMARY

- Having 5+ years of experience as **Software developer** in PHP and Angular.
- Experience in application design and development using HTML, CSS, jQuery, Ajax, PHP, CodeIgniter, Angular (7,8,9,10) and Web Technologies.
- Experience in client server application development.
- Hands on experience in Coding, Testing, Implementation in PHP and MySQL.
- Experience with several of developer tools, source control tools (like git, SVN etc.).
- Experience with Open-Project, Trello, Mantis, JIRA (web-based project management system)
- Good analytical and problem-solving skill.
- Ability to handle independently projects in PHP CodeIgniter and Web Technologies with MySQL.
- Hands on experience in Coding, Testing, Implementation in PHP, Angular and React Native app.
- Ability to fix bug and debugging application code.
- Proficiency at grasping new technical concepts quickly & utilizing it in a productive manner.
- Experience with work on Windows, CentOS, Ubuntu, fedora operating system.

THINGS I KNOW ABOUT AND PRACTICE

- Web Technologies.
- I have experience on Payment gateway (Payu Money, Razorpay, Atom), social media integration, SMS API's, WebRTC, zoom API integration, map and location API's.
- Experience in writing Web services / APIs.
- Experience in web server configuration and functionality (In AWS, Linux-based Apache server, WHM).
- I have experience on reports generations (PDF, Excel, Word) Format, design maps and charts.
- Frameworks – CodeIgniter, WordPress, wo-commerce, Angular.
- Database and Data Exchange Formats- MySQL, JSON, Third Party Libraries.
- I know other coding languages like React, React Native.
- Ability to learn new trends technology available in the markets.
- Experience with Agile Methodology.
- Must have good analytical, debugging and tracing skills.
- Experience in developing Hybrid android apps.

ROLE AND RESPONSIBILITY SUMMARY

- Currently working as, a Software Developer.
- Interaction with clients and gather business requirements and objectives.

- Develops software solutions by studying information needs; conferring with users; studying systems flow, data usage, work processes, and investigating problem areas.
- Deploying Websites, Web Application on servers (like AWS, Linux-based Apache server, WHM) and maintaining the servers.
- Analysing requirements, problems and solving them with the best solution.
- Protects operations by keeping information confidential.
- Accomplishes engineering and organization mission by completing related results as needed.

WORK EXPERIENCE

1. Invictus Corporation Pvt. Ltd. (ITWizz)

- **Website:** <http://itwizz.in/>
- **Duration:** 02 March 2017 to 30 June 2021
- **Profile:** Sr. Software Developer
- **Team:** Web Development.
- **Used and gained knowledge:** MySQL, HTML5, CSS3, JavaScript, jQuery, PHP CodeIgniter, WHM, Linux-based Apache server, Angular.

Projects

- **Maharashtra State Commerce Educational Institutes Association (MSCEIA)**
(<https://msceia.in/>)

This Application Basically made for Computer Typing Institute Through this application we maintain all records regarding all institute as well as students registered to institute. Also, we maintain the institute registration process, Exam centre allocation, Controller allocation to exam centre, Fee details of all students, new GR, Results Generation, offline tutorial and sample question paper. The supervisor can easily maintain information about new all institutes from Maharashtra and also keep the information about all student who registered to different institute in Maharashtra.

Technologies used in project: CodeIgniter, MySQL, HTML, jQuery, Ajax.

- **MIT Student Management System (SMS)**
(<http://mitaoe.edu.in/sms/>)

This Application Basically made for MIT Academy of Engineering (Alandi) Student Management System is designed for student admission process. where student can fill the admission, form pay fee with full fees and in instalment also and get things done. Student have facility to download bonafide, leaving certificate. At admin side end admin manage courses, fees depend on course and manage student, and admin can get different type of reports like course wise report, student contact report and many more. This Portal also has facility to upload student data from excel sheet. Role configuration, filed configuration is also there. Projects designing and working are totally as per client's requirement

Technologies used in project: CodeIgniter, MySQL, HTML, jQuery, Ajax.

- **MIT Human Resource Management System (HRMS)**
(<http://mitaoe.edu.in/hrms/>)

This Application Basically made for MIT Academy of Engineering (Alandi) Through this application we maintain all records regarding college Staff. Also, we maintain the Employee registration, Block/Unblock employee, assign leave for each employee, apply leave, step wise leave approval, various reports etc.

Technologies used in project: CodeIgniter, MySQL, HTML, jQuery, Ajax.

- **ICDMI**

(<https://www.icdmai.org/>)

This Application Basically made for ICDMI college. This website is built for the college. In this website we maintain college information, college activity, events, registration, latest news, important documents for download etc.

Technologies used in project: CodeIgniter, MySQL, HTML, jQuery, Ajax.

- **IICMR**

(<https://www.iicmr.org/>)

This Application Basically made for IICMR college. This website is built for the college. In this website we maintain college information, college activity, events, registration, latest news, important documents for download etc.

Technologies used in project: CodeIgniter, MySQL, HTML, jQuery, Ajax.

- **Vision Holidayss**

(http://visionholidayss.com/new_accounts/)

This Application Basically made for Vision Holidays through this application we maintain services, sale (booking for any services), group sale (booking for tour), bank verification, reports, currency exchange, receipt generation etc.

Technologies used in project: CodeIgniter, MySQL, HTML, jQuery, Ajax.

And also developed multiple E-commerce, Application and Websites

- <http://mcadc.in/>
- <http://sgrenewal.com/>
- <https://www.yourclass.live/>
- <http://stockradar.live/>
- <http://justclickaway.com/>
- <http://darshantexcoat.com/>

2. Berkeley Energy Commercial Industrial Solutions (BECIS)

- **Website:** <https://be-cis.com/>
- **Duration:** 01 July 2021 to till Date
- **Profile:** Sr. Software Developer
- **Team:** SCADA.
- **Used and gained knowledge:** MySQL, HTML5, CSS3, JavaScript, jQuery, PHP CodeIgniter, FileZilla, Linux-based Apache server, Angular.

Projects

- **Supervisory Control and Data Acquisition (SCADA)**

(<https://beatsolarindia.be-cis.com/>)

This Application Basically made for Solar Power Plant Owners Based in India. Through this application we can maintain all the records regarding all plants. Also, we maintain plant devices, device registers, generate report in graph (amcharts) and excel format for monitoring plant performance. Even we Compare individual devices for performance monitoring. Also, we monitor Alerts coming from plant. We maintain ticket System for owner, plant manager and monitoring team.

Technologies used in project: CodeIgniter, MySQL, HTML, jQuery, Ajax.

- **BEAT Solar**

(<https://beatsolarindia.be-cis.com/>)

This Application Basically made for Solar Power Plant Owners Based on world. Through this application we can maintain all the records regarding all plants. Also, we maintain plant devices, device registers, generate report in graph (toast ui, chartjs) and excel format for monitoring plant performance. Even we Compare indivial devices for performance monitoring. Also, we monitor Alerts coming from plant.

Technologies used in project: CodeIgniter, MySQL, HTML, jQuery, Ajax.

- **BEAT Bio-Energy**

(<https://beatbiosea.be-cis.com/>)

This Application Basically made for Bioenergy Power Plant Owners Based across world. Through this application we can maintain all the records regarding all plants. Also, we maintain plant devices, devices registers, and generate report in graph and excel format for monitoring plant performance. Comparison for indivial devices for performance monitoring. Monitor Alerts came from plant.

Technologies used in project: CodeIgniter, MySQL, HTML, jQuery, Ajax.

EDUCATIONAL QUALIFICATION

- **MCA** (Master in Computer Application) from Pratibha Institute of Business Management College, Pune in 2020 with **62.23%**.
- **BCS** (Bachelor in Computer Science) from Pratibha College of Commerce and Computer Studies College, Pune in 2016 with **61.20%**.
- **H.S.C** from Shri Mhalsakant Vidyalaya & JR College, Pune in 2012 with **45.00%**.

PERSONAL DETAILS

- **Date of Birth:** 07 September 1995.
- **Marital Status:** Married.
- **Permanent Location:** Pune.
- **Current Location:** Pune (Ready to relocate)
- **Language Known:** English, Hindi, Marathi.
- **Hobbies:** Cricket, Drawing.
